[ENERGY STAR Servers Dataset Discussion Document6.13.2011.pc](#)

Dear ENERGY STAR® Computer Server Partner or Other Interested Stakeholder:

Attached for your review is an updated Dataset Discussion Document that incorporates requested clarifications and suggestions received from stakeholders. It is intended as a resource for further stakeholder feedback and discussion, specifically addressing the following:

- Remind stakeholders of the dataset effort goals and scope
- Reflect stakeholder comments received on the five-point family testing proposal
- Review the configuration permutations that are of interest to EPA
- Describe EPA's thoughts on the possible role of modeling data in the effort (derived from manufacturer power calculators)
- Revise the program development timeline

EPA hopes to host a conference call to discuss the dataset effort with stakeholders in the coming weeks. Once a date has been finalized, stakeholders will be notified via email. If you did not receive this message directly and would like to receive future program notices, please email servers@energystar.gov and request to be added to the stakeholder contact list for the ENERGY STAR Server program.

Reminder: SPEC SERT® Development

SPEC continues development of SERT, the evaluation tool to be used by the ENERGY STAR program in future disclosure of active mode efficiency for qualified servers. A testing opportunity for a beta version of SERT will begin soon. Organizations interested in participating are encouraged and reminded to contact EPA at servers@energystar.gov for further instructions. Organizations who are members of SPEC are encouraged to coordinate with their SPEC representatives to get involved, or alternatively to contact EPA for assistance. As a reminder, a discussion of prerequisites for testing is available on slides 35-36 of [EPA's presentation from March 11th](#).

As a reminder, the latest revision of SPEC's design document is available [here](#). Comments are welcome and should be directed to servers@energystar.gov.

Thank you for your continued support of ENERGY STAR!

This message was sent to you on behalf of ENERGY STAR. Each ENERGY STAR partner organization must have at least one primary contact receiving e-mail to maintain partnership. If you are no longer working on ENERGY STAR, and wish to be removed as a contact, please update your contact status in your [MESA](#) account. If you are not a partner organization and wish to opt out of receiving e-mails, you may call the ENERGY STAR Hotline at 1-888-782-7937 and request to have your mass mail settings changed. Unsubscribing means that you will no longer receive program-wide or product-specific e-mails from ENERGY STAR.
